

MANAGED BY BLOOM INVESTMENT COUNSEL, INC.

BLOOM U.S. INCOME & GROWTH FUND

INTERIM REPORT FOR THE SIX MONTHS ENDED JUNE 30, 2020

BUA.UN

FORWARD-LOOKING STATEMENTS

Some of the statements contained herein including, without limitation, financial and business prospects and financial outlook may be forward-looking statements which reflect management's expectations regarding future plans and intentions, growth, results of operations, performance and business prospects and opportunities. Words such as "may," "will," "should," "could," "anticipate," "believe," "expect," "intend," "plan," "potential," "continue" and similar expressions have been used to identify these forward-looking statements. These statements reflect management's current beliefs and are based on information currently available to management. Forward-looking statements involve significant risks and uncertainties. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements including, but not limited to, changes in general economic and market conditions and other risk factors. Although the forward-looking statements contained herein are based on what management believes to be reasonable assumptions, we cannot assure that actual results will be consistent with these forward-looking statements. Investors should not place undue reliance on forward-looking statements. These forward-looking statements are made as of the date hereof, unless otherwise indicated, and we assume no obligation to update or revise them to reflect new events or circumstances.

MANAGEMENT REPORT OF FUND PERFORMANCE

This interim management report of fund performance for Bloom U.S. Income & Growth Fund (the "Fund") contains financial information but does not contain the interim or audited annual financial statements of the Fund. The interim financial statements follow this report. You may obtain a copy of any of the Fund's annual or interim reports, at no cost, by calling 1-855-BLOOM18 (1-855-256-6618) or by sending a request to Unitholder Information, Bloom Investment Counsel, Inc., Suite 1710, 150 York Street, Toronto, Ontario, M5H 3S5, or by visiting our website at www.bloomfunds.ca or SEDAR at www.sedar.com. Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, Independent Review Committee's report, or quarterly portfolio disclosure.

In accordance with investment fund industry practice, all figures presented in this management report of fund performance, unless otherwise noted, are based on the Fund's calculation of its net asset value, which is in accordance with the terms of the Fund's declaration of trust and annual information form, and is based on closing market prices of investments. Figures presented in the financial statements and the Financial Highlights section of this management report of fund performance are based on net assets calculated using International Financial Reporting Standards which require the use of a price between the last bid and ask prices for investment valuation, which may differ from the closing market price.

All figures are stated in Canadian dollars unless otherwise noted.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

THE FUND

Bloom U.S. Income & Growth Fund is a closed-end investment trust managed by Bloom Investment Counsel, Inc. (“Bloom” or the “Manager”). Bloom provides administrative services to the Fund and actively manages the Fund’s portfolio. The Class A units of the Fund trade on the Toronto Stock Exchange (“TSX”) under the symbol BUA.UN and are designed for investors who wish to make their investments in Canadian dollars. The Class U units of the Fund are designed for investors who wish to make their investments in U.S. dollars and are not listed on the Toronto Stock Exchange, but may be converted to Class A units on a monthly basis. The units of the Fund are RRSF, DPSP, RRI, RESP, RDSP and TFSA eligible. The Fund has a distribution reinvestment plan (“DRIP”) allowing Class A unitholders to automatically reinvest their monthly distributions in additional Class A units of the Fund.

RECENT DEVELOPMENTS

COVID-19 pandemic

The ongoing spread of the novel coronavirus causing COVID 19 continues to negatively impact global stock markets and may do so for some time, affecting the valuation of the Fund’s investment portfolio and consequently the net asset value and net asset value per unit of the Fund. The negative effects on the Fund of this coronavirus and any other epidemics and pandemics that may arise in the future could be complex and cannot necessarily be foreseen at the present time. The Manager continues to monitor events as they unfold and has successfully implemented an enhanced business continuity plan to ensure the seamless operation of the Manager in its roles as manager and portfolio advisor of the Fund during a period of pandemic related lockdown, by facilitating uninterrupted work and communication from home as well as addressing the various service providers.

Hedging of foreign currency

The Fund was established to enable Canadian investors to participate in the U.S. securities market. Investors were provided with the option of Class A or Class U units in order to allow the investor to choose the investment vehicle that matched their approach to currency fluctuation risk. Class A units were, and through their listing on the TSX, are, the option for investors who do not wish to be exposed to the effect of currency fluctuations. Accordingly, the Class A units are denominated in Canadian dollars and substantially all of the U.S. dollar denominated net asset value attributable to the Class A units is hedged in accordance with the Fund’s declaration of trust through the use of foreign currency forward contracts (hedges). Class U units were the option for investors who wanted to invest in U.S. dollars without the hedging of currency fluctuations. Class U units are accordingly denominated in U.S. dollars.

The Fund’s portfolio and its income are denominated in U.S. dollars, whereas the Class A units of the Fund are priced in Canadian dollars. The Fund hedges the Class A units’ currency risk by entering into foreign currency forward contracts to sell U.S. dollars and buy Canadian dollars at a set rate at a set future date.

Under these contracts, the Fund agrees to pay a fixed U.S. dollar amount in return for a fixed Canadian dollar amount at a fixed future date. The objective is to shelter the Class A unitholders of the Fund from potential fluctuations in the Canadian dollar value of U.S. currency denominated investments due to changes in the value of the Canadian dollar. This means that the Class A unitholders are substantially protected from capital losses when the Canadian dollar strengthens, but conversely do not fully participate in the capital gains available when the Canadian dollar weakens.

For instance, in both the six months ended June 30, 2020 and the period since inception on March 21, 2013 the Canadian dollar has weakened (by 4.7% and 24.7% respectively). Hedging resulted in net realized losses on foreign currency forward contracts of \$0.4 million for the six months ended June 30, 2020 and \$7.7 million for the period since inception. These losses have been netted off income and substantially offset the corresponding increase in the Canadian dollar value of the U. S. dollar denominated assets of Class A due to the weakening of the Canadian dollar against the U.S. dollar. The increase in value of U.S. denominated assets of Class A due to the weakening of the Canadian dollar is included in income as net change in unrealized appreciation or depreciation on non-derivative investments and net realized gain on sale of non-derivative investments.

INVESTMENT MANAGER

The manager was established in 1985 and specializes in the management of segregated investment portfolios for wealthy individuals, foundations, corporations, institutions and trusts. In addition to its conventional investment management business, the Manager currently manages specialty high-income equity portfolios, comprised of dividend paying common equity securities, income trusts and real estate investment trusts, for four TSX listed closed end funds.

INVESTMENT MANAGER'S REPORT

July 2, 2020

The U.S. Economy

Recent updated Federal Reserve (Fed) GDP forecasts from the Federal Open Market Committee meeting predicted a drop of just under 7% for 2020. The most recent Blue Chip survey is slightly more optimistic calling for a drop of 6.1% in 2020 and a 4% rebound next year. Current forecasts imply that complete recovery from the recession occurs in 2022 and the recuperation period could become the longest since World War II.

A key topic that has emerged is the gap that exists between private sector forecasts for the economy and those from official or government bodies. Forecasts from official bodies and governments have been much more negative. Some observers attribute this to government officials especially in central banks and on the monetary side maintaining this stance to ensure the needed fiscal stimulus is enacted by government politicians and bureaucrats. The key point to keep in mind is that not only are economic data being released during a period of virtually unprecedented volatility but also highly unreliable in some cases given the difficulties imposed by COVID-19 on collection and measurement.

According to the official body (National Bureau of Economic Research) the 2020 recession will have lasted for just two months – the shortest contraction in U.S. economic history. One of the prior shortest was a seven-month downturn in 1918-1919, which is likely relevant because it reflected the end of World War I but more importantly the outbreak of the Spanish Flu. This recession is also turning out to be the deepest since the Great Depression and will likely be near double the Great Recession's 4% decline.

Unemployment in the U.S. was running at very low historic levels when the pandemic hit. This may have been fortunate and could mean a lower peak unemployment rate. Also, wage pressures and labor shortages seen prior to March are a thing of the past. The jobless rate in May of 13.3% is expected to fall to 9.3% by year-end, 6.5% in 2021 and 5.5% in 2022 compared to 3.5% before the pandemic hit. Insolvencies and bankruptcies should be expected to rise, especially as government assistance ends, curbing hiring and capital expenditures and pressuring credit that banks hold. Both private sector and public sector debt burdens will rise and areas like commercial real estate will need to restructure. Lower crude oil prices are likely to help stimulate the economy and, as well, lower interest rates should be positive for residential housing.

U.S. Fed Chair Jerome Powell's messaging is to expect a long winding road to recovery. His recent emphatic statement that the Fed isn't "even thinking about thinking about raising rates" makes this quite clear. Expecting interest rates to be lower for longer is justified when considering 15 of 17 Fed members are not looking for any rate hike by the end of 2022. However, it lends confidence that none of the 17 are looking for negative rates in the next three years – a questionable experiment with uncertain impacts.

Reminiscent of the financial crisis in 2008-2009, economists and market participants are grappling with the shape of an economic recovery. The same language and symbols are being used – "V-shaped", "L", "U", "W" and square root. Also, the often used phrase of green-shoots meaning any positive sign of a recovery has made a return. Taking this into consideration would seem prudent: better to be approximately right and acknowledge heightened uncertainty (and position accordingly) with regard to the economic recovery rather than be precisely wrong in trying to achieve pinpoint accuracy.

U.S. Investment Markets

The S&P 500 Total Return Index posted an decrease of 3.1% for the six months to June 30, 2020 but was up 20.5% for the second quarter owing to the highly concentrated group of mega-cap stocks at the top of the index. The best performing

BLOOM U.S. INCOME & GROWTH FUND – INTERIM REPORT FOR THE SIX MONTHS ENDED JUNE 30, 2020

sectors for the first six months of the year were Information Technology, Consumer Discretionary and Communication Services while the worst performing sectors were Energy, Financials and Industrials.

Most stock market indicators positively reinforced the rally that closed out the second quarter. The oil price regained the \$40 level and copper regained \$2.60 – a level last seen in February. Employment as further explained below was also supportive. The hold-out was the bond market. The U.S. Labor Department reported employers adding 2.5 million jobs in May against an expectation for a loss of 8 million jobs. This sent the market sharply higher and yields increased to just below 1%. However, the 10-year Treasury did not hold these levels and in a bearish signal subsequently settled back below 0.7%.

Volatility returned to the markets on June 11th following a negative outlook from the Fed. Consistent with this, the Fed indicated interest rates would remain near zero through 2022. High reported cases globally of COVID-19 and concerns over a second wave also contributed to weakness. By the end of the week the market had fallen 7%. Much of this pullback was attributed to the rally in the preceding weeks and markets being overbought on positive sentiment concerning monetary stimulus, fiscal stimulus and economic re-opening. However, on June 16th markets reversed course and resumed their ascent on positive news that the Fed would buy individual corporate bonds having previously only purchased corporate credit Exchange Traded Funds (ETFs) under a secondary market facility. This was further supported by news of a U.S. administration \$1 trillion infrastructure spending program.

It is being commonly reported that an increase in retail brokerage accounts with more people at home and on-line was helping to drive the recent rally in the market. Notwithstanding this, the level of global money market assets has risen to a record high near \$5 trillion vs. approximately \$4 trillion at the peak of the financial crisis. Although this is global, the U.S. market is the largest market and greatest potential receiver in the world. It is positively supportive that there is such a great amount of cash on the sidelines.

In the last 15 years the market-cap weighted S&P 500 has substantially outperformed the S&P 500 equally weighted index. Also, both small and large-cap stocks closely tracked each other during the ten-year period before 2015. It is only in the last five years that the S&P 500 has outperformed small-caps substantially. The equal weighted S&P 500 has not. What this means is that this wide margin of outperformance is attributable mostly to the five (give or take) largest stocks which are commonly known to be driving the momentum factor in the market. If this momentum is not sustained, it stands to reason that relative performance opportunity still exists in other areas of the market and that valuations in these other areas of the market could be more reasonable than perceived by some.

The U.S. dollar appreciated against the Canadian dollar during the period by 4.9% and has appreciated against the Canadian dollar by 4.2% over the trailing 12-months. The flight to safety and demand for U.S. dollars to repay liabilities in a forced or discretionary manner caused the world's reserve currency to appreciate sharply against other world currencies during March and closing out the first quarter, although these currency shifts saw a partial reversal in the second quarter.

Fund Performance

The Fund returned negative 29.1% for the first six months of the year, which underperformed the S&P 500 Total Return Index. Positions in Weyerhaeuser Co., Tronox Holdings plc and Eli Lilly & Co. were the greatest contributors to performance while First Financial Bancorp, National CineMedia Inc., and Atlas Corp. were the greatest detractors. The strongest performing sectors for the Fund were Real Estate, Materials and Health Care while the weakest performers were Financials, Industrials and Consumer Discretionary.

The most recent measure of Active Share for Bloom U.S. Income & Growth Fund was a very high 98%. Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index. We believe this high Active Share gives the Fund a greater ability to take advantage of upside opportunities or protect against downside risk very distinctly in comparison to the great number of less active manager's with performance that closely follows the benchmark.

Since the Fund is actively managed, the sector weightings differ from those of the index mentioned above (the "Index"). The Fund's portfolio contains predominantly high dividend paying securities, whereas the Index does not necessarily focus on this type of investment. Also, the Fund may invest in issuers that are not included in the Index. Further, the Index is calculated without the deduction of management fees and fund expenses, whereas the performance of the Fund is calculated after deducting such fees and expenses. For these reasons it is not expected that the Fund's performance will mirror that of the Index.

Outlook

Recent economic and market conditions have made it necessary for many companies to eliminate, reduce or temporarily suspend their dividends. A clear example of the future of dividends can be seen in the S&P 500 dividend futures. The market is pricing in dividends not to return to levels seen in 2019 until 2027. Two reasons for this are that companies need to shore-up liquidity and balance sheet strength as earnings dip and corporate taxes are likely to increase to be part of paying for emergency COVID-19 government deficits and borrowing. Active investment management has an opportunity to add value by selecting investments with dividends more likely to be reinstated or that will be more reliable in the future. Strong but sustainable dividend payers should have a higher scarcity value as a result.

While many market participants are investing with a short term bias, we believe that fundamentals and valuation should not be ignored. History has shown that higher yielding stocks outperform in the long term and this should not be lost sight of during challenging markets like the ones we are currently navigating.

RESULTS OF OPERATIONS

Distributions

During the six months ended June 30, 2020 distributions totaled \$0.30 per Class A unit and US\$0.30 per Class U unit. The 2020 distribution reflects a monthly rate per unit of \$0.05 per Class A unit and US\$0.05 per Class U unit, in accordance with the targeted distribution rate of 6% per annum on the subscription price of \$10 per unit as disclosed in the Fund's Prospectus. Since inception on March 21, 2013, the Fund has paid total cash and reinvested distributions of \$4.36774 per Class A unit and US\$4.36774 per Class U unit.

Allocation of income, expenses, gains and losses between classes of the Fund

The income, expenses, gains and losses of the Fund are generally allocated between Class A and Class U on the basis of the Classes' relative net asset values. However there are certain transactions which are class specific and are allocated to a particular class. These include certain expenses of Class A relating to its distribution reinvestment plan (DRIP), certain expenses of Class U relating to the Class U conversion privilege, fees charged by the Canadian Depository for Securities which are specific to each of the classes, and the unrealized and realized gains and losses on the foreign currency forward contracts which relate to the hedging of the US dollar denominated net asset value attributable to the Class A units, and which are allocated to Class A.

Decrease in Net Assets from Operations

The Fund's net loss from investments was \$2.8 million (\$2.36 per Class A unit and \$2.46 per Class U unit) for the six months ended June 30, 2020, arising from average portfolio investments during the period of \$7.0 million. Net investment loss was comprised primarily of net change in unrealized appreciation on investments for the period of negative \$3.0 million, net realized loss on foreign currency forward contracts of \$0.4 million, and net increase in unrealized depreciation on foreign currency forward contracts of \$0.2 million, offset by \$0.5 million in net realized gains on sale of non-derivative investments and \$0.2 million in dividend and distribution income.

Expenses were \$0.1 million (\$0.12 per Class A unit and \$0.22 per Class U unit) for the six months ended June 30, 2020, the major components being management fees of \$48,166 and other administrative expenses of \$48,051.

Net Asset Value

The net asset value per unit of Class A units of the Fund was \$5.38 at June 30, 2020, down by 34.0% from \$8.15 at December 31, 2019. The net asset value per unit of Class U units of the Fund was US\$5.49 at June 30, 2020, down by 32.6% from US\$8.15 at December 31, 2019.

The aggregate net asset value of the Fund decreased from \$10.0 million at December 31, 2019 to \$6.6 million as at June 30, 2020, primarily due to net loss from investments of \$2.8 million and distributions to unitholders of \$0.4 million.

Liquidity

To provide liquidity for unitholders, Class A units of the Fund are listed on the TSX under the symbol BUA.UN. Class U units are not listed on the TSX but are convertible to Class A units on a monthly basis.

Investment Portfolio

The Fund has established a portfolio invested in U.S. equities and income trusts, each of which was selected to achieve the investment objectives of the Fund.

BLOOM U.S. INCOME & GROWTH FUND – INTERIM REPORT FOR THE SIX MONTHS ENDED JUNE 30, 2020

During the six months ended June 30, 2020 the percentage of the portfolio (equities and cash) invested in the Industrial sector has fallen from 21.9% to 18.2% due to above average price weakness in this sector. The Financials sector has decreased from 11.9% to 10.5% due primarily to the sale of a large portion of the Fund's position in New York Community Bancorp, Inc. The Materials sector has risen from 11.3% to 12.4% of the portfolio, due to above average price strength of CatchMark Timber Trust Inc. The sales of stocks along with the general reduction in values over the period have led to an increase in cash and cash equivalents from 9.7% to 12.9%.

The Fund had net unrealized depreciation of \$0.6 million on its portfolio as at June 30, 2020, with unrealized appreciation of \$0.4 million in each of the Health Care and Information Technology sectors offset by unrealized depreciation of \$0.6 million in the Industrials sector, \$0.5 million in the Consumer Discretionary sector and \$0.3 million in the Materials sector.

The Fund had net realized gains on sales of investments of \$0.5 million during the six months ended June 30, 2020, including gains on the sale of holdings in Eli Lilly and Company and Intel Corporation.

Portfolio Sectors

Sector	Value (thousands)	% of Total
Real Estate	\$ 1,439	21.4%
Industrials	1,226	18.2%
Cash	868	12.9%
Materials	836	12.4%
Financials	704	10.5%
Consumer Discretionary	562	8.4%
Health Care	559	8.3%
Information Technology	530	7.9%
Total	\$ 6,724	100.0%

RELATED PARTY TRANSACTIONS

Related party transactions consist of administrative and investment management services provided by the Manager pursuant to the Fund's Declaration of Trust, and Fund expenses paid by the Manager and recharged to the Fund.

Administration and Investment Management Fees

Pursuant to the Fund's Declaration of Trust, the Manager provides investment management and administrative services to the Fund, for which it is paid an annual management fee aggregating to 1.15% per annum of the net asset value of the Fund, calculated weekly and payable monthly in arrears, plus applicable taxes.

The management fee is intended to compensate the Manager for providing portfolio advisory and certain administrative services to the Fund. For the six months ended June 30, 2020, management fees charged directly to the Fund amounted to \$48,166.

Services received by the Fund in consideration of the management fee, as an approximate percentage of the management fee, comprise portfolio advisory services (70%) and administrative services (30%). Administrative services include: appointment and monitoring of service providers; administration related to the payment of fund expenses and the deposit of fund receipts; administrative services provided to the Independent Review Committee ("IRC"); review and filing of tax returns; preparation, dissemination and filing of annual and interim reports; maintenance of proxy voting records and the voting of proxies; preparation of monthly portfolio summaries; regulatory reporting; and maintenance of the information on the Fund's website.

Other Expenses Recharged to the Fund

The Fund pays for all other ordinary expenses incurred in connection with the operation and administration of the Fund, including: all costs of portfolio transactions, fees payable to third party services providers, custodial fees, legal, accounting, audit and valuation fees and expenses, expenses of the members of the IRC, expenses related to compliance with National Instrument 81-107 ("NI 81-107"), fees and expenses relating to the voting of proxies by a third party, costs of reporting to

unitholders, registrar, transfer and distribution agency costs, printing and mailing costs, listing fees and expenses and other administrative expenses and costs incurred in connection with the continuous public filing requirements, taxes, brokerage commissions, costs and expenses relating to the issue of units of the Fund, costs and expenses of preparing financial and other reports, costs and expenses arising as a result of complying with all applicable laws, regulations and policies, extraordinary expenses that the Fund may incur and all amounts paid on account of indebtedness.

On an ongoing basis the Manager pays on behalf of the Fund, and subsequently recharges to the Fund, certain of these expenses of the Fund. For the six months ended June 30, 2020 the Fund expensed unitholder information costs of \$1,610, IRC fees of \$13,610, filing fees of \$271, wire service fees of \$288 and premiums for insurance coverage for members of the IRC of \$279, which were paid and recharged by the Manager.

INDEPENDENT REVIEW COMMITTEE

Prior to the Fund's launch, the IRC for the Fund was established pursuant to NI 81-107 and became operational. The IRC provides independent oversight regarding actual and perceived conflicts of interest involving the Fund and performs all other functions required of an independent review committee under NI 81-107. Costs and expenses, including the remuneration of IRC members, the costs of legal and other advisors to, and legal and other services for, IRC members, and insurance costs are chargeable to the Fund. As at June 30, 2020 the IRC consisted of three members, all of whom are independent of the Manager.

The Manager has received three standing instructions from the IRC with respect to related party transactions:

Allocation of Fund Expenses and Charging Expenses of Related Entities to the Funds

The standing instruction requires that the Manager follow its policy regarding the charging of expenses of related parties to the Fund, which will, in the IRC's opinion, result in a fair and reasonable result for the Fund. The Manager reports any instances of reliance on the standing instruction to the IRC and the IRC reviews the transactions to confirm compliance with the standing instruction. The Manager relies on the standing instruction on an ongoing basis in charging to the Fund expenses which are payable by the Fund as per the Fund's Declaration of Trust and Annual Information Form, but which have been paid by the Manager. These expense charges are measured on an accrual basis at the monetary value of the expenses incurred.

The Decision to Re-open a Fund

The standing instruction requires that the Manager follow its policy and procedures concerning fund re-openings, which will, in the IRC's opinion, result in a fair and reasonable result for the Fund. The Manager will report any instances of reliance on the standing instruction to the IRC, but has not yet relied on this standing instruction.

Redemption of Units Held or Controlled by Access Persons

The standing instruction requires that the Manager follow its policy and procedures concerning the redemption of units held or controlled by Access Persons of the Manager, which will, in the IRC's opinion, result in a fair and reasonable result for the Fund. Access Persons include employees, their spouses, life partners, and family members (including minor and adult children) sharing a home with an employee, as well as any others for whose accounts the employee can exercise control. The Manager will report any instances of reliance on the standing instruction to the IRC, but has not yet relied on this standing instruction.

PAST PERFORMANCE

The following chart and table show the past performance of the Fund. Past performance does not necessarily indicate how the Fund will perform in the future. The information shown is based on net asset value per unit and assumes that distributions made by the Fund in the period were reinvested at net asset value per unit in additional units of the Fund.

Annual Compound Returns

The following table shows the Fund's annual compound return for the one, three and five year periods ended June 30, 2020 and the period since commencement of operations on March 21, 2013, compared with the S&P 500 Total Return Index ("Index"). The returns of Class U are expressed in both Canadian dollars and US dollars. The Index tracks the performance, on a market weight basis and a total return basis, of a broad index of large-capitalization issuers listed on the S&P 500, including common stocks and REITs, and is an appropriate benchmark as the Fund invests in such common stocks and REITs. Since the Fund is actively managed, the sector weightings differ from those of the Index. Also, the Fund's portfolio contains predominantly high dividend paying securities, whereas the Index does not necessarily focus on this type of investment. As well, at present the Fund largely invests in issuers that are not included in the Index (the Fund's Active Share, a measure of how the Fund's portfolio differs from the Index, is 97.8%). Further, the Index is calculated without the deduction of management fees, service fees and fund expenses, whereas the performance of the Fund is

BLOOM U.S. INCOME & GROWTH FUND – INTERIM REPORT FOR THE SIX MONTHS ENDED JUNE 30, 2020

calculated after deducting such fees and expenses. For these reasons it is not expected that the Fund's performance will mirror that of the Index.

	One year	Three years	Five years	Since inception ⁽¹⁾
Bloom U.S. Income & Growth Fund Class A (net of fees and expenses)	-20.8%	-5.5%	-2.8%	-0.3%
Bloom U.S. Income & Growth Fund Class U in C\$ (net of fees and expenses)	-15.9%	-3.9%	-0.5%	3.9%
S&P 500 Total Return Index in Canadian dollars	12.1%	12.5%	12.7%	16.6%
Bloom U.S. Income & Growth Fund Class U in US\$ (net of fees and expenses)	-19.3%	-5.4%	-2.5%	0.0%
S&P 500 Total Return Index in US dollars	7.5%	10.7%	10.7%	12.2%

⁽¹⁾ Period from March 21, 2013 (commencement of operations) to June 30, 2020

During the one, three and five year periods ended June 30, 2020 and since inception, Class A of the Fund has underperformed relative to the Index, after taking into account the expenses of the Fund. Class U of the Fund has also underperformed the Index for all periods. In addition to the effect of the deduction of management fees, service fees and expenses inherent in the Fund's performance figures, this reflects the differences in individual portfolio selections between the Fund's portfolio and the Index within each of the sectors, which result in different average sector returns. It may also reflect difference in average sector weightings between the Fund's portfolio and the Index over these periods.

Year-by-Year Returns

The bar chart shows the Fund's performance for each fiscal period since commencement of operations on March 21, 2013. It shows, in percentage terms, how a Canadian dollar investment in Class A and a US dollar investment in Class U, expressed both in Canadian and US dollars, held on the first day of the fiscal period would have changed by the last day of the fiscal period.

⁽¹⁾ Period from March 21, 2013 (commencement of operations) to December 31, 2013

⁽²⁾ Year from January 1 to December 31 of the year indicated

⁽³⁾ Six months from January 1 to June 30, 2020

BLOOM U.S. INCOME & GROWTH FUND – INTERIM REPORT FOR THE SIX MONTHS ENDED JUNE 30, 2020**FINANCIAL HIGHLIGHTS**

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the fiscal periods indicated. *The information in the following tables is presented in accordance with National Instrument ("NI") 81-106 and, as a result, does not act as a continuity of opening and closing net assets per unit, because the increase in net assets from operations is based on weighted average units outstanding during the period, and all other numbers are based on actual units outstanding at the relevant point in time.*

Net Assets Per Unit – Class A

⁽¹⁾ This information is derived from the Fund's financial statements, to which International Financial Reporting Standards apply.

⁽²⁾ Net assets per unit and distributions per unit are based on the actual number of units outstanding at the relevant time. The increase in net assets from operations per unit is based on the weighted average number of units outstanding over the fiscal period.

⁽³⁾ \$31,866 (2019: \$40,011; 2018: \$61,139; 2017: \$76,776; 2016: \$186,101) of distributions was reinvested in units under the Fund's Class A distribution reinvestment plan ("DRIP"). The remainder of the distributions was paid in cash.

⁽⁴⁾ Class U net assets per unit are translated into US\$ at the exchange rate in effect at the measurement date. Class U increases from operations are translated into US\$ at the average exchange rate for the period. Class U distributions are paid in US\$.

Management expense ratio (“MER”) ⁽²⁾	3.74%	5.05%	3.12%	4.78%	3.00%	3.99%	2.98%	3.78%	2.79%	2.92%
Trading expense ratio ⁽³⁾	0.04%	0.04%	0.07%	0.07%	0.04%	0.04%	0.09%	0.09%	0.07%	0.07%
Portfolio turnover rate ⁽⁴⁾	1.99%	1.99%	1.57%	1.57%	3.73%	3.73%	5.89%	5.89%	8.34%	8.34%
Net asset value per Unit ⁽¹⁾	\$ 5.38	\$ 7.48 (US\$5.49)	\$ 8.15	\$ 10.57 (US\$8.15)	\$ 6.45	\$ 8.83 (US\$6.46)	\$ 8.20	\$ 10.39 (US\$8.29)	\$ 8.58	\$ 11.54 (US\$8.61)
Closing market price ⁽¹⁾	\$ 5.20	N/A	\$ 7.76	N/A	\$ 6.27	N/A	\$ 7.99	N/A	\$ 8.26	N/A

⁽¹⁾ As at the period end date shown

⁽²⁾ MER is based on the requirements of NI 81-106 and includes the total expenses (excluding withholding taxes, commissions and other portfolio transaction costs) of the Class for the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the average net asset value of the Fund during the period.

⁽⁴⁾ The Fund’s portfolio turnover rate indicates how actively the Manager manages the Fund’s portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund’s portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, excluding cash and short-term investments maturing in less than one year, by the average market value of investments during the period.

Management Expense Ratio

The MER of Class A of the Fund was 3.74% for the six months ended June 30, 2020, up from an MER of 3.12% in the year ended December 31, 2019. The MER of Class U of the Fund was 5.05% for the six months ended June 30, 2020, up from an MER of 4.78% in the year ended December 31, 2019. The increase is primarily due to the decrease in average net asset value through the redemption of units and market value fluctuations which, when paired with fixed costs, caused the MER to increase.

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020

1. GENERAL INFORMATION

Bloom U.S. Income & Growth Fund (the “Fund”) is a closed-end investment trust established under the laws of the province of Ontario pursuant to a declaration of trust dated February 25, 2013, as amended and restated on April 25, 2013. The address of the Fund’s principal place of business is 150 York Street, Toronto, Ontario. The Fund invests in equity securities of U.S. companies. The financial statements are presented in Canadian dollars.

The Fund’s investment objectives are to provide unitholders with exposure to an actively managed portfolio consisting primarily of publicly traded high dividend paying U.S. common securities, stable cash distributions, and the opportunity for capital appreciation.

The Class A units of the Fund are listed on the Toronto Stock Exchange (“TSX”) under the symbol BUA.UN. Class U units are designed for investors wishing to make their investments in U.S. dollars and are not listed on the TSX, but may be converted to Class A units on a monthly basis. The Fund commenced operations on March 21, 2013 and reorganized its structure on April 26, 2013.

The manager and trustee of the Fund is Bloom Investment Counsel, Inc. (the “Manager”). CIBC Mellon Trust Company is the custodian of the Fund and CIBC Mellon Global Securities Services Company is the administrator of the Fund.

These financial statements were authorized for issue by the Manager on August 10, 2020.

2. BASIS OF PRESENTATION

These financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) as applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Statements.

These financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit and loss (“FVTPL”). The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the funds significant accounting policies. Actual results could differ from those estimates.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Financial instruments

The Fund’s financial instruments include, where applicable, non-derivative investments, cash, dividends and distributions receivable, receivable for investments sold, payable for investments purchased, distributions payable to holders of redeemable units, accrued liabilities, redemptions payable, derivative assets and liabilities (unrealized appreciation and depreciation on foreign currency forward contracts) and obligation for net assets attributable to unitholders of redeemable units.

The Fund recognizes, classifies and measures financial instruments in accordance with IFRS 9. IFRS 9 requires financial instruments to be recognized initially at their fair value and then classified as subsequently as measured at amortized cost, measured at fair value with changes in fair value taken through other comprehensive income or measured at fair value with changes in fair value recognized in profit and loss (“FVTPL”) based on the Fund’s business model for managing financial assets in accordance with the Fund’s documented investment strategy and the contractual cash flow characteristics of the financial assets. Assessment and decision on the business model approach used is an accounting judgment.

The Fund recognizes financial instruments at fair value, plus transaction costs in the case of financial instruments measured at amortized cost, upon initial recognition. Purchases and sales of financial instruments are recognized on their respective trade dates.

The Fund’s investments and derivative assets and liabilities are measured at FVTPL. The Fund’s obligation for net assets attributable to holders of redeemable units represents a financial liability and is measured at FVTPL, with fair value being the redemption amount as of the reporting date. All other financial instruments are measured at amortized cost (which is the amount to be received or paid, discounted where appropriate at the contract’s effective interest rate). Amortization and changes in fair value are recognized in the Statements of Comprehensive Income.

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

b) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial assets traded in active markets (which includes the Fund’s non-derivative investments) is based on quoted market prices at the close of trading on the reporting date. The Fund uses the last traded market price for investment valuation where that price falls between the latest bid and ask prices. In circumstances where the last traded price is not within the bid-ask spread, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

The fair value of financial assets and liabilities that are not traded in an active market (which include the Fund’s foreign currency forward contracts), is determined using valuation techniques. The Manager uses a variety of methods and makes assumptions that are based on market conditions at each reporting date. Valuation techniques may include the use of comparable recent arm’s length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and others commonly used by market participants and make the maximum use of observable inputs.

The Fund classifies fair value measurements within a hierarchy as described in note 15. The Fund recognizes transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

c) Impairment of financial assets at amortized cost

At each reporting date, the Fund assesses whether there is objective evidence that a financial asset at amortized cost is impaired. If such evidence exists, the Fund recognizes an impairment loss as the difference between the amortized cost of the financial asset and the present value of the estimated future cash flows, discounted using the instrument’s original effective interest rate. Impairment losses on financial assets at amortized cost are reversed in subsequent periods if the amount of the loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized.

d) Derecognition of financial assets and liabilities

The Fund derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership are transferred, or in which these risks and rewards are neither transferred nor retained but the Fund does not retain control of the asset. On derecognition of a financial asset, the difference between the carrying amount of the asset and the consideration received is included in the Statements of Comprehensive Income. The Fund derecognizes a financial liability when its contractual obligations are discharged, cancelled or expire.

The Fund enters into securities lending transactions in which it lends investments to counterparties, but since the Fund retains all of the risks and rewards of ownership, the investments are not derecognized. Collateral pledged by the counterparty to a securities lending transaction is not recognized as the Fund does not accept the risks and rewards of ownership of that collateral.

e) Offsetting

Financial assets and liabilities are offset and the net amount presented in the Statements of Financial Position only when the Fund has a legal right to offset the amounts and it intends to either settle on a net basis or realize the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS, e.g. for gains and losses arising from a group of similar transactions, such as realized gains and losses on investments.

f) Cash

Cash consist of deposits with financial institutions.

g) Foreign currency forward contracts

The Fund may enter into foreign currency forward contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These are over-the-counter derivatives and are valued at FVTPL. The fair value of the buy side of a contract is netted with the fair value of the sell side of the contract when there is a contractual ability to

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

settle on a net basis. The fair value is recorded as an unrealized appreciation or depreciation on foreign currency forward contracts in the Statements of Financial Position.

The fair value of such contracts will fluctuate with changes in currency exchange rates, and the change in fair value is included as 'Net change in unrealized appreciation or depreciation on foreign currency forward contracts' in the Statements of Comprehensive Income. When the contract is closed, the Fund reverses any previously recognized change in unrealized appreciation or depreciation and records a realized gain or loss equal to the difference between the value of the contract on the date it was opened and the value on the date it was closed, which is included as 'Net realized gain (loss) on foreign currency forward contracts' in the Statements of Comprehensive Income.

h) Investment transactions and income recognition

Investment transactions are recorded on the trade date. Dividend and distribution income are recognized when the right to receive payment is established, which is generally on the ex-dividend or ex-distribution date. Realized and unrealized gains and losses from investment transactions are calculated on an average cost basis.

i) Allocation of income, expenses, gains and losses between classes

The income, expenses, gains and losses of the Fund are generally allocated between Class A and Class U on the basis of the Classes' relative net asset values. However there are certain transactions which are class specific and are allocated to a particular class. These include: certain expenses of Class A relating to its distribution reinvestment plan ("DRIP"); certain expenses of Class U relating to the Class U conversion privilege; and the unrealized and realized gains and losses on the foreign currency forward contracts which relate to the hedging of the US dollar denominated value of the net assets attributable to the Class A units, and which are allocated to Class A.

j) Foreign exchange

The functional and presentation currency of the Fund is the Canadian dollar. Any currency other than the Canadian dollar represents foreign currency to the Fund. Proceeds received from the issuance of, and redemption proceeds payable on the redemption of, the Fund's Class A units are denominated in Canadian dollars. Proceeds received from the issuance of, and redemption proceeds payable on the redemption of, the Fund's Class U Units are denominated in U.S. dollars. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates that the transactions occur. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the measurement date. Foreign exchange gains and losses relating to cash are presented as 'Foreign exchange gain (loss) on cash' and those relating to investment and derivatives are presented within 'Net realized gain (loss) on sale of non-derivative investments', 'Net change in unrealized appreciation or depreciation on non-derivative investments', 'Net realized gain (loss) on foreign currency forward contracts' and 'Net unrealized appreciation or depreciation on foreign currency forward contracts', as applicable, in the Statements of Comprehensive Income.

k) Increase (decrease) in net assets attributable to holders of redeemable units from operations per unit

Increase (decrease) in net assets attributable to holders of redeemable units from operations per unit for each class of redeemable units represents the increase (decrease) in net assets attributable to holders of redeemable units from operations for each class for the period divided by the weighted average number of redeemable units of the class outstanding during the period.

l) Distributions

Income and net realized capital gains (reduced by loss carryforwards, if any) earned by the Fund are distributed to unitholders through a regular monthly distribution. Any excess income and net realized capital gains not so distributed during the year are distributed in December of each year to unitholders. Any excess of regular monthly distributions over actual income and net realized capital gains is characterized as a return of capital. Any distributable net realized capital gains in a year may be allocated for tax purposes to redeeming unitholders in that year, as permitted by the Fund's declaration of trust.

m) Portfolio transaction costs

Commissions and other portfolio transaction costs on purchases and sales of investments are expensed and are included in 'Portfolio transaction costs' in the Statements of Comprehensive Income. Portfolio transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of an investment, which include fees and commissions paid to agents, advisors, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties.

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

n) Classification of obligation to holders of redeemable units

The Manager is required by IAS 32, *Financial Instruments: Presentation* (IAS 32) to assess whether the obligation to holders of redeemable units represents a liability of the Fund or equity of the Fund. The Fund has multiple obligations, being those under the monthly redemption option and those under the annual redemption option, to deliver cash or other financial instruments to the unitholders. The Class A units and Class U units do not have identical features. As a result, the obligation to unitholders is classified as a liability.

o) Net assets attributable to holders of redeemable units per unit

The net assets attributable to holders of redeemable units per unit is calculated by dividing the net assets attributable to holders of redeemable units of a particular class by the total number of units of that particular class outstanding at the end of the period.

p) Redemption of units

When units of the Fund are redeemed at a price per unit which is higher or lower than the net asset value per unit at the time, the difference is included in the Statements of Comprehensive Income as 'Gain (loss) on redemption of redeemable units'.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of financial statements requires management to use judgment in applying its accounting policies and to make estimates and assumptions about the future. The following discusses the most significant accounting judgments and estimates that the Fund has made in preparing the financial statements:

Assessment of functional currency

The Manager is required to make a significant judgment about the functional currency of the Fund. The Manager assessed the primary indicators (including the currencies in which income is received and in which expenses are paid) and secondary indicators (including the currency in which funds from financing activities are raised) as prescribed by IFRS, and as a result of this assessment has concluded that the functional currency of the Fund is the Canadian dollar.

5. TAXATION

The Fund qualifies as a mutual fund trust under the Income Tax Act (Canada) and accordingly is subject to income tax on its income, including net realized capital gains, which is not paid or payable to the Fund's unitholders. The Fund's taxation year end is December 31. No provision for income taxes has been recorded in the accompanying financial statements as the Fund has determined that it is in substance not taxable since all net income and net realized capital gains of the Fund for the year are distributed to the unitholders to the extent necessary to reduce income taxes payable to nil.

Since the Fund does not record income taxes, the tax assets or liabilities related to capital and non-capital losses and other temporary differences have not been reflected in the Statements of Financial Position as a deferred income tax asset or liabilities.

Non-capital loss carry forwards may be applied against future years' taxable income, and may be carried forward for 20 years from the year in which they are realized. As at June 30, 2020, the Fund had no non-capital losses carried forward (December 31, 2019 – nil). Capital losses incurred by the Fund may be carried forward indefinitely to apply against capital gains realized in future years. As at June 30, 2020, the Fund had \$1,628,011 in capital losses available for carryforward (December 31, 2019 – \$1,628,011).

The Fund currently incurs withholding taxes imposed by certain countries on investment income and capital gains. Such income and gains are recorded on a gross basis and the related withholding taxes are shown as a separate expense in the Statements of Comprehensive Income.

6. REDEEMABLE UNITS

The Fund is authorized to issue an unlimited number of classes or series of units. Initially, two classes of units, designated as Class A units and Class U units, were created and authorized for issuance. The Class A units are designed for investors wishing to make their investments in Canadian dollars, and the Class U units are designed for investors wishing to make their investment in U.S. dollars. Each unit of a class entitles the holder to one vote at all meetings of the unitholders and at all meetings of holders of that class, and to participate equally with respect to any and all distributions to the class made by the Fund.

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

A holder of Class U units may convert such Class U units into Class A units on a monthly basis by delivering a notice and surrendering such Class U units by 3:00 p.m. (Toronto time) at least ten business days prior to the first business day of each month (the “Conversion Date”). For each Class U unit so converted, a holder will receive that number of Class A units equal to the net asset value (“NAV”) per unit of a Class U unit converted to Canadian dollars using the Bank of Canada closing rate as at the close of trading on the business day immediately preceding the Conversion Date divided by the NAV per unit of a Class A unit as at the close of trading on the business day immediately preceding the Conversion Date. No fraction of a Class A unit will be issued upon any conversion of Class U units and any fractional amounts will be rounded down to the nearest whole number of Class A units.

Class A units and Class U units may be surrendered for redemption annually at the option of the unitholders during the period from September 15 until 5:00 p.m. (Toronto time) on the last business day in September, subject to the Fund’s right to suspend redemptions in certain circumstances. Units properly surrendered for redemption will be redeemed on the second last business day of October (the “Annual Redemption Date”) and the redeeming unitholders will receive a redemption price per unit equal to 100% of the Net Asset Value per unit of the relevant class as determined on the Annual Redemption Date, less any costs and expenses incurred by the Fund in order to fund such redemption, including brokerage costs and less any net realized capital gains or income of the Fund that is distributed to unitholders concurrently with the redemption proceeds.

The 2019 annual redemption took place on October 30, 2019 and consisted of 212,668 Class A units for redemption proceeds of \$1,675,427 and 2,000 Class U units for proceeds of US\$15,779 (\$20,796), payable on November 20, 2019.

In addition, Class A units and Class U units may also be redeemed on the second last business day of each month other than a month in which an Annual Redemption date occurs (“Monthly Redemption Date”). Units must be surrendered for redemption prior to 5:00 p.m. on the last business day of the month preceding the Monthly Redemption Date. Unitholders surrendering Class A units for redemption will receive a redemption price per Class A unit equal to the lesser of: (a) 94% of the weighted average trading price on the TSX for the 10 trading days immediately preceding the Monthly Redemption Date (market price) of a Class A unit; and (b) 100% of the closing market price of a Class A unit on the applicable Monthly Redemption Date less, in each case, any costs associated with the redemption, including brokerage costs and less any net realized capital gains or income of the Fund that is distributed to unitholders concurrently with the redemption proceeds. Unitholders surrendering a Class U unit for redemption will receive in U.S. dollars an amount equal to the U.S. dollar equivalent of the product of: (a) Class A monthly redemption amount; and (b) a fraction, the numerator of which is the most recently calculated NAV per unit of a Class U unit and the denominator of which is the most recently calculated NAV per unit of a Class A unit. For such purpose, the Fund will utilize the exchange rate current at, or as nearly as practicable to, the Monthly Redemption Date in respect of a monthly redemption of Class U units.

For the six months ended June 30, 2020, no Class A or Class U units were redeemed under the monthly redemption option (2019 – no Class A units were redeemed under the monthly redemption option, and 3,750 Class U units were redeemed under the monthly redemption option for proceeds of US\$25,200 (\$33,187)).

If a significant number of units are redeemed, the trading liquidity of the units could be significantly reduced. In addition, the expenses of the Fund would be spread among fewer units resulting in a potentially lower distribution per unit. The Manager has the ability to terminate the Fund if, in its opinion, it would be in the best interests of the unitholders to do so. The Manager may also suspend the redemption of units in certain circumstances.

Unit transactions of the Fund for the six months ended June 30, 2020 and 2019 were as follows:

	2020		2019	
	Class A	Class U	Class A	Class U
Units outstanding at beginning of year	1,142,954	61,460	1,359,927	74,510
Redemptions	–	–	–	(3,750)
Class U units converted to Class A	294	(220)	1,073	(800)
Units outstanding at end of year	1,143,248	61,240	1,361,000	69,960

The closing market price of the Fund’s Class A units on June 30, 2020 was \$5.20 (December 31, 2019: \$7.76).

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

7. CAPITAL MANAGEMENT

For operating purposes, redeemable units issued and outstanding are considered to be the capital of the Fund. As at June 30, 2020 the Fund's capital therefore comprised net assets attributable to holders of redeemable units of \$6,603,057 (December 31, 2019 – \$9,969,913). The Fund's objectives in managing its capital are to provide unitholders with monthly cash distributions and the opportunity to participate in gains in the value of the investment portfolio. The Fund manages its capital taking into consideration the risk characteristics of its holdings. In order to manage its capital structure, the Fund may adjust the amount of distributions paid to unitholders, return capital to unitholders, increase or decrease its level of borrowing if applicable, or purchase units for cancellation.

8. DISTRIBUTIONS TO UNITHOLDERS

Distributions, as declared on the Fund's behalf by the Manager, are made on a monthly basis to unitholders of record on the last business day of each month, payable by the fifteenth business day of the following month. For the six months ended June 30, 2020, the Fund declared total distributions of \$0.30 (2019 – \$0.30) per Class A unit and US\$0.30 (2019 – US\$0.30) per Class U unit, which amounted to \$342,945 (2019 – \$408,085) for Class A units and US\$18,394 (\$25,203) (2019 – US\$21,336 (\$28,338)) for Class U units. Under the Fund's distribution reinvestment plan ("DRIP"), unitholders may elect to reinvest monthly distributions on Class A units in additional Class A units of the Fund which are purchased on the open market. For the six months ended June 30, 2020, distributions of \$31,866 were reinvested in 5,546 Class A units of the Fund which were purchased on the open market (2019 – \$40,011 reinvested in 5,434 Class A units of the Fund).

In conjunction with the annual redemption described in note 6, the Fund made no distributions of capital gains to redeeming unitholders.

9. EXPENSES

Management fees and other reasonable expenses incurred in the operations of the Fund are charged as expenses in the Statements of Comprehensive Income of the Fund, and include expenses paid by the manager on behalf of the Fund and subsequently recharged to the Fund as described in note 10.

The Fund pays for all other expenses incurred in connection with the operation and administration of the Fund, including: all costs of portfolio transactions, fees payable to third party services providers, custodial fees, legal, accounting, audit and valuation fees and expenses, expenses of the members of the Independent Review Committee ("IRC"), expenses related to compliance with National Instrument 81-107, fees and expenses relating to the voting of proxies by a third party, costs of reporting to unitholders, registrar, transfer and distribution agency costs, printing and mailing costs, listing fees and expenses and other administrative expenses and costs incurred in connection with the continuous public filing requirements, taxes, brokerage commissions, costs and expenses relating to the issue of units of the Fund, costs and expenses of preparing financial and other reports, costs and expenses arising as a result of complying with all applicable laws, regulations and policies and all amounts paid on account of indebtedness.

10. RELATED PARTY TRANSACTIONS

In accordance with the Declaration of Trust, the Manager is entitled to an annual management fee of 1.15% per annum of the NAV of the Fund, calculated weekly and paid monthly in arrears, plus applicable taxes.

For the six months ended June 30, 2020, the Fund expensed management fees of \$48,166 (2019 – \$68,672). As at June 30, 2020, the Fund had management fees payable of \$7,171 (December 31, 2019 – \$10,566) included in accrued liabilities.

On an ongoing basis, the Manager pays on behalf of the Fund, and subsequently recharges to the Fund, certain expenses of the Fund. For the six months ended June 30, 2020 the Fund expensed IRC fees of \$13,610 (2019 – \$14,049), filing fees of \$271 (2019 – \$nil) and wire service fees of \$288 (2019 – \$nil) (both included in 'unitholder reporting costs') and unitholder information costs of \$1,610 (2019 – \$6,753) and premiums for insurance coverage for members of the IRC of \$279 (2019 – \$217) (both included in 'other administrative expenses') which were paid and recharged by the Manager. As at June 30, 2020 the Fund owed the Manager \$299 for recharged expenses (December 31, 2019 – \$314) included in accrued liabilities.

Units held by the Manager and its affiliates represent 11.7% of the Class A units outstanding at June 30, 2020 (December 31, 2019 – 11.7%).

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

11. PORTFOLIO TRANSACTION COSTS

During the six months ended June 30, 2020 the Fund paid \$1,422 (2019 – \$2,344) in brokerage commissions and other portfolio transaction costs. There are no soft dollar commissions.

12. SECURITIES LENDING

The Fund has entered into a securities lending program with CIBC Mellon Global Securities Services Company, (as administrator), which has a DBRS credit rating of AA / R-1 / Positive and a Moody's credit rating of A1 / P-1 / Stable, and BNY Mellon (as lending agent), which has a DBRS credit rating of AA / R-1 / Stable and a Moody's credit rating of Aa1 / P-1 / Stable. The Manager suspended the Fund's participation in the securities lending program during the six months ended June 30, 2020, but can reactivate the Fund's participation at any time.

Securities lending transactions involve the temporary exchange of securities for collateral with a commitment to deliver the same securities and collateral on a specified future date. Income is earned in the form of fees paid by the counterparty and is recognised on the accrual basis in the Statements of Comprehensive Income. The Fund retains the risks and rewards of ownership of the securities loaned, and therefore these securities do not qualify for derecognition and therefore remain in the Statements of Financial Position of the Fund during the loan period. The risks and rewards of ownership include any gains or losses in market value of the securities, the ability to sell the securities, and any dividends or distributions on the securities for which the ex-dividend dates fall within the loan period.

The Fund receives collateral of at least 102% of the value of securities on loan. Should a borrower default on a securities loan, the Fund is entitled to the associated collateral. The Fund is not exposed to the risks and rewards of ownership of the collateral therefore the collateral is not included in the Fund's Statements of Financial Position. Collateral may comprise: debt that is issued or guaranteed by the Government of Canada or a province thereof, by the Government of the United States of America or of one of the states of the United States of America or of a sovereign state of the G7 countries, or of Austria, Belgium, Denmark, Finland, the Netherlands, Spain, Sweden, or Switzerland, or a permitted supranational agency of Organisation for Economic Coordination and Development countries; debt that is issued or guaranteed by a financial institution whose short-term debt is rated A-1 or R-1 or equivalent and includes bankers acceptances, banker bearer deposit notes, or irrevocable letters of credit; corporate debt or corporate commercial paper; or convertible securities.

The aggregate fair value of securities loaned (which equals their carrying amount) and the aggregate fair value of the associated collateral under securities lending transactions as at June 30, 2020 and December 31, 2019 are as follows:

June 30, 2020		December 31, 2019	
Fair value of securities loaned	Fair value of collateral	Fair value of securities loaned	Fair value of collateral
\$ –	\$ –	\$ 1,992,170	\$ 2,098,608

As at June 30, 2020, there were no securities loaned and therefore there was no collateral (December 31, 2019, the collateral consisted of debt that is issued or fully and unconditionally guaranteed as to the principal and interest by the government of Canada, a province of Canada, the government of the United States of America or the government of Germany or France.)

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

The table below sets out a reconciliation of the gross amounts generated from securities lending transactions to the securities lending income disclosed in the Statements of Comprehensive Income for the six months ended June 30, 2020 and 2019:

	June 30, 2020		June 30, 2019	
	\$	% of gross income	\$	% of gross income
Securities lending income	\$ 327	70.6%	\$ 7,460	57.3%
Agent fees paid to the lending agent	136	29.4%	3,149	24.2%
Withholding tax	–	0.0%	2,407	18.5%
Gross securities lending income	<u>\$ 463</u>		<u>\$ 13,016</u>	

13. FOREIGN CURRENCY FORWARD CONTRACTS

The Fund was established to enable Canadian investors to participate in the U.S. securities market. Investors were provided with the option of Class A or Class U units in order to allow the investor to choose the investment vehicle that matched their approach to currency fluctuation risk. Class A units were, and through their listing on the TSX, are, the option for investors who do not wish to be exposed to the effect of currency fluctuations. Accordingly, the Class A units are denominated in Canadian dollars and substantially all of the U.S. dollar denominated value of the net assets attributable to Class A is hedged in accordance with the Fund’s declaration of trust through the use of foreign currency forward contracts (hedges). Class U units were the option for investors who wanted to invest in U.S. dollars without the hedging of currency fluctuations. Class U units are accordingly denominated in U.S. dollars.

The Fund’s portfolio and its income are denominated in U.S. dollars, whereas the Class A units of the Fund are priced in Canadian dollars. The Fund hedges the Class A units’ currency risk by entering into foreign currency forward contracts to sell U.S. dollars and buy Canadian dollars at a set rate at a set future date.

To achieve the required hedge, the Fund has entered into rolling foreign currency forward contracts with terms of approximately one month, with a financial institution which has a DBRS credit rating of AA / R-1 / Stable, and a Moody’s credit rating of Aa2 / P-1 / Stable. Under these contracts, the Fund agrees to pay a fixed U.S. dollar amount in return for a fixed Canadian dollar amount at a fixed future date. The objective is to shelter the Class A unitholders of the Fund from potential fluctuations in the Canadian dollar value of U.S. currency denominated investments due to changes in the value of the Canadian dollar. This means that the Class A unitholders are substantially protected from capital losses when the Canadian dollar strengthens, but conversely may not fully participate in the capital gains available when the Canadian dollar weakens.

The Fund is subject to enforceable master netting arrangements in the form of International Swaps and Derivatives Association agreements with the counterparty to the foreign currency forward contracts. The value of the amount to be received (purchased) by the Fund, which represents a financial asset of the Fund, is offset with the value of the amount to be paid (sold) by the Fund, which represents a financial liability to the Fund, and the net amount is presented as unrealized appreciation or depreciation on foreign currency forward contract in the Statements of Financial Position.

As at June 30, 2020, the Fund held the following foreign currency forward contract:

Gross financial liability			Gross financial asset			Unrealized appreciation
Notional value	Currency	Fair value CAD	Notional value	Currency	Settlement date	
(3,450,000)	USD	(4,698,660)	4,684,410	CAD	July 22, 2020	\$ (14,250)

As at December 31, 2019, the Fund held the following foreign currency forward contract:

Gross financial liability			Gross financial asset			Unrealized depreciation
Notional value	Currency	Fair value CAD	Notional value	Currency	Settlement date	
(6,200,000)	USD	(8,039,633)	8,221,200	CAD	January 8, 2020	\$ 181,567

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

14. RISK ASSOCIATED WITH FINANCIAL INSTRUMENTS

a) Risk factors

The Fund's investment activities expose it to a variety of risks associated with financial instruments.

The Manager seeks to maximize the returns derived for the level of risk to which the Fund is exposed and to minimize potential adverse effects on the Fund's performance by employing professional and experienced portfolio managers, by daily monitoring of the Fund's positions and market events, and by diversifying the investment portfolio within the constraints of the investment objectives and restrictions. The Manager also maintains a governance structure that oversees the Fund's investment activities and monitors compliance with the Fund's stated investment objectives and restrictions, internal guidelines and securities regulations.

b) Credit risk

The Fund is exposed to credit risk, which is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. The carrying amount of the Fund's assets represents the maximum credit risk exposure as at June 30, 2020 and December 31, 2019.

All transactions in listed securities are settled upon delivery using approved brokers. The trade will fail if either party fails to meet its obligations. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

The Fund enters into securities lending transactions with counterparties whereby the Fund temporarily exchanges securities for collateral with a commitment by the counterparty to deliver the same securities at a future date. All counterparties are subject to a stringent examination of creditworthiness which includes a financial assessment of the company, a review of qualitative factors including management and corporate governance, comparison to similar companies and consideration of ratings assigned by external ratings agencies, and the value of collateral must be at least 102% of the fair value of the securities loaned. Therefore credit risk associated with these transactions is considered minimal.

The Fund also enters into foreign currency forward contracts as described in note 13.

The Fund limits its exposure to credit loss by dealing with counterparties, including the lending agent and foreign currency forward contract counterparty, of high credit quality (see notes 12 and 13). To maximize the credit quality of its investments, the Fund's Manager performs ongoing credit evaluations based upon factors surrounding the credit risk of counterparties, historical trends and other information. Given that the Fund is primarily invested in equities, credit risk is not considered significant.

c) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market or market segment. All investments present a risk of loss of capital. The Manager aims to moderate this risk through a careful selection and diversification of securities and other financial instruments within the limits of the Fund's investment objectives and strategy. The maximum risk of loss resulting from financial instruments is equivalent to their fair value.

The Fund is exposed to price risk from its investment in equity securities. As at June 30, 2020 had the prices of these securities increased or decreased by 10%, with all other variables held constant, net assets attributable to holders of redeemable units would have increased or decreased by approximately \$585,614 (December 31, 2019 – \$901,871) or 8.9% (December 31, 2019 – 9.0%) of net assets. In practice, the actual results may differ and the impact could be material.

d) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting obligations associated with financial liabilities. The Fund is exposed to liquidity risk through the monthly and annual redemption of its units and targeted monthly distributions, because there may be insufficient trade volumes in the markets for the securities of the Fund or because the securities may be subject to legal or contractual restrictions on their resale. The Fund receives notice of at least 21 business days prior to the date of an annual redemption of units and at least 19 business days prior to a monthly redemption date,

NOTES TO FINANCIAL STATEMENTS (unaudited)

June 30, 2020 (continued)

and has up to 15 business days after the annual or monthly redemption date to settle the redemptions, which provides the Manager time to liquidate securities to fund the redemptions, although there remains a risk that the required funds cannot be obtained. All other liabilities of the Fund mature in six months or less. Liquidity risk is managed by investing the majority of the Fund’s assets in investments that are traded in an active market and can be readily disposed of.

e) Interest rate risk

Interest rate risk arises on interest-bearing financial instruments. As at June 30, 2020 and December 31, 2019, the Fund had no significant exposure to interest rate risk as it did not hold any interest bearing securities.

f) Currency risk

Currency risk arises on financial instruments denominated in foreign currencies. Fluctuations in foreign exchange rates impact the valuation of assets and liabilities denominated in foreign currencies.

The Fund is invested primarily in publicly traded U.S. securities denominated in U.S. dollars and limits the currency risk associated with the Class A units through the use of hedging via foreign currency forward contracts as described in note 13. While substantially all of the U.S. dollar value of net assets attributable to the Class A units is hedged, the remaining unhedged amount could expose Class A to potential losses and gains.

The Fund’s Class U units are redeemable in U.S. dollars, and are therefore only subject to Canadian dollar exposure with respect to certain administrative expenses. The net assets attributable to the Class U units exclude unrealized gains or losses from foreign currency forward contract.

As at June 30, 2020, the Fund’s direct exposure to currency risk associated with the Class A units, after the effects of the foreign currency forward contract hedge, was as follows:

Currency	Class A currency risk exposed holdings		Net Class A exposure	As a percentage of Class A net assets
	Monetary	Non-monetary		
U.S. dollars	\$ (4,035,360)	\$ 5,457,259	\$ 1,421,899	23.14%

As at December 31, 2019, the Fund’s direct exposure to currency risk associated with the Class A units, after the effects of the foreign currency forward contract hedge, was as follows:

Currency	Class A currency risk exposed holdings		Net Class A exposure	As a percentage of Class A net assets
	Monetary	Non-monetary		
U.S. dollars	\$ (7,264,585)	\$ 8,441,958	\$ 1,177,373	12.63%

As at June 30, 2020, had the U.S. dollar exchange rate increased or decreased by 5% with all other variables held constant, the net unhedged exposure to currency risk associated with the Class A units would have increased or decreased the net assets of the Fund attributable to the Class A units by \$71,095 or 1.16% (December 31, 2019 – \$58,869 or 0.63%). In practice, the actual exchange rate fluctuations may differ and the impact could be material.

June 30, 2020 (continued)

g) Concentration risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, product type, industry sector or counterparty type. The following is a summary of the Fund's concentration risk, expressed in terms of percentage of net assets invested by sector as at June 30, 2020 and December 31, 2019:

Market Segment	June 30, 2020	December 31, 2019
Consumer Discretionary	8.5%	8.2%
Financials	10.7%	11.9%
Health Care	8.4%	8.0%
Industrials	18.6%	21.9%
Information Technology	8.0%	7.2%
Materials	12.7%	11.3%
Real Estate	21.8%	21.8%

15. FAIR VALUE HIERARCHY

The Fund classifies fair value measurements within a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Manager has the ability to access at the measurement date;
- Level 2 Inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly; and
- Level 3 Inputs that are unobservable. The determination of fair value requires significant management judgment or estimation.

If inputs of different levels are used to measure an asset's or liability's fair value, the classification within the hierarchy is based on the lowest level input that is significant to the fair value measurement. The following fair value hierarchy table presents information about the Fund's financial instruments measured at fair value as at June 30, 2020 and December 31, 2019:

June 30, 2020	Level 1	Level 2	Level 3	Total
Equities	\$ 5,856,144	\$ –	\$ –	\$ 5,856,144
Unrealized depreciation on foreign currency forward contract	–	(14,250)	–	(14,250)
	\$ 5,856,144	\$ (14,250)	\$ –	\$ 5,841,894
December 31, 2019	Level 1	Level 2	Level 3	Total
Equities	\$ 9,018,706	\$ –	\$ –	\$ 9,018,706
Unrealized appreciation on foreign currency forward contract	–	181,567	–	181,567
	\$ 9,018,706	\$ 181,567	\$ –	\$ 9,200,273

The measurement of the gross financial liability arising under the Fund's foreign exchange forward contracts as disclosed in note 13 uses Level 2 inputs, being the current USD spot exchange rate and the current 30 day USD forward exchange rate. An interpolation is performed to obtain the fair value of the liability as of the reporting date.

There were no transfers between the levels during the periods ended June 30, 2020 and December 31, 2019.
